

## OPTIONAL DETERMINATION OF NON-SIGNIFICANCE (DNS) NOTICE MATERIALS

The attached materials are being sent to you pursuant to the requirements for the Optional DNS Process (WAC 197-11-355). A DNS on the attached proposal is likely. This may be the only opportunity to comment on environmental impacts of the proposal. Mitigation measures from standard codes will apply. Project review may require mitigation regardless of whether an EIS is prepared. A copy of the subsequent threshold determination for this proposal may be obtained upon request.

# **ENVIRONMENTAL CHECKLIST**

Permit Procle@2009

Thank you in advance for your cooperation and adherence to these procedures. If you need assistance in completing the checklist or have any questions regarding the environmental review process, please visit or call Development Services (425-452-6800) between 8 a.m. and 4 p.m., Monday through Friday (Wednesday, 10 to 4). Assistance for the hearing impaired: Dial 711 (Telecommunications Relay Service).

#### INTRODUCTION

## **Purpose of the Checklist:**

The State Environmental Policy Act (SEPA), Chapter 43.21c RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the City of Bellevue identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the City decide whether an EIS is required.

#### **Instructions for Applicants:**

This environmental checklist asks you to describe some basic information about your proposal. Answer the questions briefly, with the most precise information known, or give the best description you can. You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer or if a question does not apply to your proposal, write "do not know" or "does not apply." Giving complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the Planner in the Permit Center can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. Include reference to any reports on studies that you are aware of which are relevant to the answers you provide. The City may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impacts.

Use of a Checklist for Nonproject Proposals: A nonproject proposal includes plans, policies, and programs where actions are different or broader than a single site-specific proposal.

For nonproject proposals, complete the Environmental Checklist even though you may answer "does not apply" to most questions. In addition, complete the Supplemental Sheet for Nonproject Actions available from Permit Processing.

For nonproject actions, the references in the checklist to the words *project*, *applicant*, and *property* or *site* should be read as *proposal*, *proposer*, and *affected geographic area*, respectively.

Attach an 8 ½" x 11 vicinity map which accurately locates the proposed site.

BACKGROUND INFORMATION				
Property Owner: Maria Jevell				
Proponent:	J			
Contact Person: (If different from the owner. All questions and correspondence will be di Address: 4255 120 Ax JE	rected to the individual listed.)			
Proposal Title: Tree removal				
Proposal Location: 4355 120 Ave SE, 98006 (Street address and nearest cross street or intersection) Provide a legal	·			
Please attach an 8 ½" x 11" vicinity map that accurately locates the proposal site.				
Give an accurate, brief description of the proposal's scope and nature:				
1. General description: Tree removal				
2. Acreage of site:				
3. Number of dwelling units/buildings to be demolished: O				
4. Number of dwelling units/buildings to be constructed: 0	A minimum of 5 trees			
5. Square footage of buildings to be demolished: O	were previously removed from a steep slope and			
6. Square footage of buildings to be constructed: •	steep slope buffer.			
7. Quantity of earth movement (in cubic yards):   Restoration/replanting will be required under				
this permit application.  8. Proposed land use:				
9. Design features, including building height, number of stories and proposed exterior materials:				
10. Other remove 4 trees damaging house	•			

Estimated date of completion of the proposal or timing of phasing: 30, 4 2017

Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. List dates applied for and file numbers, if known.
List any government approvals or permits that will be needed for your proposal, if known. If permits have been applied for, list application date and file numbers, if known.
Please provide one or more of the following exhibits, if applicable to your proposal. (Please check appropriate box(es) for exhibits submitted with your proposal):
Land Use Reclassification (rezone) Map of existing and proposed zoning
Preliminary Plat or Planned Unit Development Preliminary plat map
Clearing & Grading Permit  Plan of existing and proposed grading  Development plans
Building Permit (or Design Review) Site plan Clearing & grading plan
Shoreline Management Permit Site plan
A. ENVIRONMENTAL ELEMENTS
1. Earth
a. General description of the site: Flat Rolling Alling Steep slopes Mountains Other
b. What is the steepest slope on the site (approximate percent slope)?  There are steep slopes over 40% on the west part of the site, regulated critical area
c. What general types of soil are found on the site (for example, clay, sand, gravei, peat, and muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.
d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

		<i>"</i>
	×	

	e.	Describe the purpose, type, and approximate quantities of any f	filling or grading proposed. Indicate source
		none	No grading or ground disturbance occurred with prior tree removal.
	f.	Could erosion occur as a result of clearing, construction, or use?	? If so, generally describe.
	g.	About what percent of the site will be covered with impervious s example, asphalt or buildings)?	urfaces after project construction (for
	h.	Proposed measures to reduce or control erosion, or other impact	cts to the earth, if any:
2.	AIR		
	a.	What types of emissions to the air would result from the proposa wood smoke) during construction and when the project is complete approximate quantities if known.	l (i.e. dust, automobile odors, and industrial eted? If any, generally describe and give
		_	9
	b.	Are there any off-site sources of emissions or odor that may affe	ct your proposal? If so, generally describe.
			*
	C.	Proposed measures to reduce or control emissions or other impa	acts to the air, if any:
3.	WAT	TER	
	a.	Surface	
		(1) Is there any surface water body on or in the immediate v seasonal streams, saltwater, lakes, ponds, wetlands)? If appropriate, state what stream or river it flows into.	vicinity of the site (including year-round and f yes, describe type and provide names. If
		(2) Will the project require any work over, in, or adjacent to Yes, please describe and attach available plans.	(within 200 feet) the described waters? If

	(3)	Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.
	(4)	Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.
	(5)	December were seed lie within a 100 year floodylain? If no note location on the site plan
	(5)	Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.
	(6)	Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.
b.	Ground	*
	(1)	Will ground water be withdrawn, or will water be discharged to ground water? Give general description.
	(2)	Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals; agricultural; etc.) Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.
		¥
C.	Water F	Runoff (Including storm water)
		Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.
	(2)	Could waste materials enter ground or surface waters? If so, generally describe.

4.	Plants				
	a.	Check or circle types of vegetation found on the site:			91.
		deciduous tree: alder, maple, aspen, other			
		evergreen tree: fir, cedar, pine, other			
		shrubs			
		grass			
		pasture			
		☐ crop or grain			
		wet soil plants: cattail, buttercup, bulrush, skunk cabbage, o	other		
		water plants: water lily, eelgrass, milfoil, other			
		other types of vegetation			
	b.	What kind and amount of vegetation will be removed or altered?	A	(= :	
	D.	+ evergreen trees	A minimum previously r	of 5 trees we removed from	re steep
		( 605)	slope area	removed from and steep slo	oe buffer
	C.	List threatened or endangered species known to be on or near the s	site.		
	<b>.</b>	and an outer of or an ingeneral species and an incention of outer and an incention of outer and outer and outer an incention outer and outer an incention outer and outer and outer and outer an incention outer and outer an incention outer and outer an incention outer and out			
	d.	Proposed landscaping, use of native plants, or other measures to p	reserve or enhan	nce vegetation on	the
		site, if any: bushes planted around			
		bosition plantice attained	oo yest	Replanting v	vill be
5.	ANIMA	LS		required	
	a.	Check or circle any birds and animals which have been observed o or near the site:	n or near the site	or are known to	be on
		Birds: hawk, heron, eagle, songbirds, other:			
		Mammals: deer, bear, elk, beaver, other:			
		Fish: bass, salmon, trout, herring, shellfish, other:			

d. Proposed measures to reduce or control surface, ground, and runoff water impacts, if any:

<ul> <li>List any threatened or endangered species known to be on or near the site</li> </ul>	b.	List any threatened	or endangered	species known	to be on or near the site
---	----	---------------------	---------------	---------------	---------------------------

- c. Is the site part of a migration route? If so, explain.
- d. Proposed measures to preserve or enhance wildlife, if any:

#### 6. Energy and Natural Resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy need? Describe whether it will be used for heating, manufacturing, etc.
- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.
- c. What kinds of energy conservation features are included in the plans of the proposal? List other proposed measures to reduce or control energy impacts, if any:

#### 7. Environmental Health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.
  - (1) Describe special emergency services that might be required.
  - (2) Proposed measures to reduce or control environmental health hazards, if any-

		- •	
n .	NI.	oise	

	b.	Noise	
		(1)	What types of noise exist in the area which may affect your project (for example, traffic, equipment, operation, other)?
		(2)	What types and levels of noise would be created by or associated with the project on a short-term or long-term basis (for example, traffic, construction, operation, other)? Indicate what hours noise would come from the site.
		(3)	Proposed measures to reduce or control noise impacts, if any:
8.	Land a	and Shore	eline Use
	a.	What is	the current use of the site and adjacent properties?
	b.	Has the	site been used for agriculture? If so, describe.
	C.	Describe	e any structures on the site.
	d.	Will any	structures be demolished? If so, what?
	e.	What is	the current zoning classification of the site?
	ll f.	What is	the current comprehensive plan designation of the site?
	g.	If applic	able, what is the current shoreline master program designation of the site?
	h.	Has any	part of the site been classified as an "environmentally sensitive" area? If so, specify.
	I.	Approxim	nately how many people would reside or work in the completed project?

j. Approximately how many people would the completed project displace?

d uses and plans, if
e, or low-income
dle, or low-income
ne principal exterior
::

### 11. Light and Glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
- b. Could light or glare from the finished project be a safety hazard or interfere with views?
- c. What existing off-site sources of light or glare may affect your proposal?
- d. Proposed measures to reduce or control light or glare impacts, if any:

#### 12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?
- b. Would the proposed project displace any existing recreational uses? If so, describe.
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

#### 13. Historic and Cultural Preservation

- a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.
- b. Generally describe any landmarks or evidence of historic, archeological, scientific, or cultural importance known to be on or next to the site.
- c. Proposed measures to reduce or control impacts, if any:

# 14. Transportation

- a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.
- b. Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?
- c. How many parking spaces would be completed project have? How many would the project eliminate?

- d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private).
- e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.
- f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.
- g. Proposed measures to reduce or control transportation impacts, if any:

#### 15. Public Services

- a. Would the project result in an increased need for the public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.
- b. Proposed measures to reduce or control direct impacts on public services, if any:

#### 16. Utilities

- a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.
- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

## Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.
